

17.08.2020

According to the **REACH regulation**, companies that manufacture **1 ton or more of chemical substances per year** within the EU or import them to the EU , as of June 1, 2008 are obliged to register these substances with the European Chemicals Agency (ECHA).

Since REACH is a system requiring registration on a substance basis, preparation manufacturers also have to register the chemical substances in their products.

REACH obligations for mixtures ; release in mixture registering when the amount of the substance intended to be released in the mixture exceeds 1 ton, reporting the substances of high importance (SVHC) and communicating information about the substances contained in the articles. **If the substance is registered for the same use, for example by the substance manufacturer, the article exporter / importer does not have to register the substance.**

The raw materials used in the production of TuraSept and ORVENS coded disinfectant products that we produce as Turan Kimya have been approved by REACH and are listed below with their approval numbers.

Raw Materials	REACH Registration Number	%
Ethanol	01-2119457610-43-0038	66
Benzalkonium Chloride	-	0,1
Glycerine	Exempt	0,5
T.E.A	01-21194864XX-XX	0,3
Flogel FG 1000	-	0,9
Water	Exempt	32,2

**The declaration letter of Flogel FG 1000 and Glycerine product is attached.

Best regards.
