## **Watmind Statement on the Age of Applicable Population**

Shenzhen Watmind Medical Co.,Ltd, manufacturer of SARS-CoV-2 Antigen Schnelltest zur Eigenanwendung (kolloidales Gold) with BfArM listing No. 5640-S-032/21 (Ag Test for short).

According to our in-house clinical evaluation, the Ag Test can be used both for adults over 18 and children 4-17 years old. For children between 4-17 years old should be sampled by adults. There is no any medical evidence shows that the Ag Test can't be used by children from 4-17 years old.

However in the IFU of our BfArM approved Ag Test version it status for use over 18 years old population only. We advise to consult local related authorities or Bfarm if it is planning to be used for children between 4-17 years old.

We are on the process of application for extending the limit of age between 4-17 years old.

With kind regards,
